Our values

- We will work inclusively within our communities, embracing the varied localities we serve while sharing our common vision and values.
- We will develop the very best leaders of the future, working to improve education and transform lives.
- We will adhere unwaveringly to the ‘Nolan Principles’ of Public Service, which is made clear in our commitment to Ethical Leadership.

1 Introduction

1.1 This generic model publication scheme has been prepared and approved by the Information Commissioner. It has been adopted by ATT ('the authority').

1.2 This publication scheme commits an authority to make information available to the public as part of its normal business activities. The information covered is included in the classes of information mentioned below, where this information is held by the authority. Additional assistance is provided to the definition of these classes in sector specific guidance manuals issued by the Information Commissioner.

1.3 The scheme commits an authority:

- To proactively publish or otherwise make available as a matter of routine, information, including environmental information, which is held by the authority and falls within the classifications below
- To specify the information which is held by the authority and falls within the classifications below
- To proactively publish or otherwise make available as a matter of routine, information in line with the statements contained within this scheme
- To produce and publish the methods by which the specific information is made routinely available so that it can be easily identified and accessed by the members of the public
- To review and update on a regular basis the information the authority makes available under this scheme
- To produce a schedule of any fees charged for access to information which is made proactively available
- To make this publication scheme available to the public.
- To publish any dataset held by the authority that has been requested, and any updated versions it holds, unless the authority is satisfied that it is not appropriate to do so, to publish the dataset, where reasonably practicable, in an electronic form that is capable of re-use, and, if any information in the dataset is a relevant copyright work and the public authority is the only owner, to make the information available for re-use under the terms of the Re-use of Public Sector Information Regulations 2015, if the apply, and otherwise under the terms of the Freedom of Information Act section 19. The term "dataset" is defined in section 11 (5) of the Freedom of Information Act. The term "relevant copyright work" is defined in section 19 (8) of that Act.
